Happiness
& Comfort By
Energy Saving”*

SITE DHA PHASE II

PALSETINE EMBASSY DIPLOMATIC ENCLAVE, ISLAMABAD, PAKISTAN

ABOUT US

Dynamic Solar International (DSI) is founded in 1999 enjoys magnificent position in the Heat Resistant and Water Proof construction industry in Pakistan, as our products are of international quality standards and we believe in constant product development. We offer products, conforming to high quality standards of durability and aesthetic values. Our offices, located at Rawalpindi and Islamabad always ensure the best of their services to the valued client.

We are proud to be a one stop shop for our valued client providing Heat Resistant and Water Proof Solar Chips. The brand name of Dynamic Solar International ensures comfort and satisfaction of the client, with DSI as its corporate identity, the company looks to newer areas for growth.

PROBLEMS

The most effective method to cool your home is to avoid the heat from building up in the first place. The primary source of heat buildup is sunlight absorbed by your house through the roofs, best solution is to apply our DSI Chips as it has water proof, heat resistant and heat reflective properties. DSI Solar Chips keep the room temperature at a normal level during peak sunlight time. The absorbed radiations do not let the Solar Chips temperature increase as Solar Chips is designed for this purpose. This keeps the upper layer temperature of the roof at a normal level throughout the day; even one can walk on it bare footed at noon in summers.

The temperature of roof will remain the same like it was in the morning and resultantly the room temperature will also remain the same. Similarly, the ceiling fan will give cool air through out the day as it gives cool air at 9am thus creating no pressing need for AC usage. Insulation will maintain the temperature of your building because it will neither become too hot nor too cool. As your DSI roof insulation does not allow heat to enter the building when the outside temperature is high in summers.

SOLUTION: DSI HEAT PROOF SOLAR CHIPS

During summers, Pakistanis are especially vulnerable to hot weather hazards, most of the cities of Pakistan can be as much as 10 to 15 degree warmer than surrounding areas because the cities infra structure largely made up of asphalt, concrete and metal that traps the heat. Keeping cool indoor when it is hot outdoor is a problem. The sun beating down on our homes causes indoor temperature to rise to uncomfortable levels. Air conditioning provides some relief but the initial cost of installing an air conditioner and the electricity costs to run it can be high. About the third of the unwanted heat that builds up in your home comes in through the roof. This is hard to control with traditional roofing materials.

DSI Solar Chips Insulation 100 % Heat Proof & Water Proof with life time guaranty. Saves energy (air-conditioners') and bill reduces up to 70%.

Solar chemical chips investment on your home roof will payback within 3 year. Your room temperature will retain same all the day.

TEST REPORT

Report No.: MR-011123-205

Client / Establishment : M/s. Dynamic solar international,
64 Jinnah Ave, Block H & 7/2 Blue Area.

Sample ID : MS-011123-207
Sample Receiving Date : 01/11/2023
Reporting Date : 13/11/2023
Date of Analysis : 01/11/2023-11/11/2023
Tested by : RE
Issue No : 01(Re-Issue Date: NA)

Sample Information:

Sample Name : Roof Insulation Material

Test Results

Parameter	Test Method	Unit	Result
Thermal Conductivity	ASTM C518-21	W/m.K	0.0201
Thermal Resistance	ASTM C518-21	K.m ² /W	1.2438

Test location: Ajman

BEST INSULATION FOR ROOF, WALLS AND WATER TANKS.

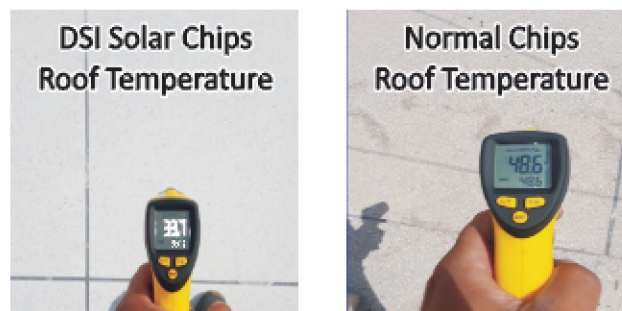

The Best insulation for roof, walls and water tanks have some specific scientific values. Efficiency of an insulation depends on its k-value and R-Value. According to the American Society for Testing Materials (ASTM). The lower the k-value, the longer it takes for heat to escape the insulated equipment. The greater the R-value, the better the insulation is at opposing the flow of heat energy. Polyurethane is the best insulation world wide acceptable and its k-value is 0.02 same as **DSI SOLAR CHIPS**. Concrete has an R-value of between 0.1 and 0.2 but **DSI SOLAR CHIPS** has higher R-Value 1.24/inch. **SOLAR CHIPS OF DYNAMIC SOLAR INTERNATIONAL** provides all these values accurately as Various test procedures have been performed on our **DSI SOLAR CHIPS BY INTERNATIONAL LABORATORIES**

Issue No: 2
Form MRF-09

TECHNICAL DATA
NCL Material Testing Lab
At Nilore Islamabad

Chips panel standard size of box 30"x30" inches. Heat Proof Solar Chips thickness 3/4" size.

DSI professionally applies Heat Proof Solar Chemical powder at the upper layer of the roof which reflects spectrum radiation (visible portion) and absorbs infrared rays only.

TESTIMONIAL

Mr. Salman Bashir

(Ex High Commissioner in India)

“ I would like to thank your company Dynamic Solar International for the great job you recently carried out insulating roof of our house by heat resistant and water proof insulation. The product that your company manufactures is really wonderful. We noticed the temperature difference, it's amazing. I would like to thank you for a great job. I am very happy and satisfied with the works carried out. I am very pleased with the insulation and it looks really good! ”

Air Commodore Jahanzeb Masood

(Air University)

“ We would like to express our sincere "thank you" for a job well done! My house is 100% heat resistant and water proof now by the Solar Chips of Dynamic Solar International. Everyone involved, did a fantastic job. We would like to recommend heat resistant and water proof Solar Chips of Dynamic Solar International roof insulation to our friends and family. Again, thank you from some very happy and satisfied customers. Thank you for making our dream comes true. ”

Admiral (R) Noman Basheer

(Ex Chief Of Naval Staff)

“ We had insulated our roof through heat resistant and water proof Solar Chips of Dynamic Solar International. It worked fantastic all day in very hot temperatures. I wanted to thank DSI Solar Chips for saving us from long hot and burning days of summer. We are pleased with the results of course, it will be interesting in the winter & summer months to see the full results. We look forward to that. We would definitely recommend you to our friends. Thanks for excellent supervision. ”

Dr. Rizwan

(Professor Ripha University)

“ As it is now 1 & half year since the heat resistant and water proof Solar Chips of Dynamic Solar International apply on roof, I feel now, I am more qualified to give a fair opinion of its benefits. Friends who have seen your insulation are most impressed with its appearance and the improvement it has made to our house. During summer & winter we have found the house to be much warmer in winter and cold in summer. The electric convertor heater & AC have been at a lower setting than pre-installation. In short, we are extremely pleased with the fantastic insulation. ”

TESTIMONIAL

**Gen. (R) Jahangir Anwar Khan
(C Sector, DHA I)**

“ We are really pleased to have met you, regarding the heat resistant and water proof insulation of Solar Chips of Dynamic Solar International. We are impressed with the service and information you gave us. The insulation is really amazing and wonderful. The temperature remains moderate throughout the season. We would certainly recommend your company for the product and the service you provide. ”

**Mr. Fahad Basheer
(CEO Zahaid & Company)**

“ I just wanted to let you know that we are very pleased with the final result of our insulated roof by heat resistant and water proof Solar Chips of Dynamic Solar International. The finish looks stunning. Thank you so much for providing such a wonderful heat resistant and water proof insulation. I would recommend DSI Solar Chips highly to my friends and family. It was a pleasure having it and I am so pleased at the fantastic job done by you. ”

**Dr. Shehzad
(H Sector DHA II Islamabad)**

“ We had successfully insulated roof of our house by heat resistant and water proof Solar Chips of Dynamic Solar International. Whenever I read customer comments, one sometimes wonders how believable they are, well, I can tell anyone reading through various feedbacks here that they are 100% genuine. I certainly expected an improvement, but the difference this has made is amazing. Overall temperature fluctuation from minimum to maximum is just 6 degrees. Cost of the installation was very reasonably priced considering it has transformed our house into an all year round extension. ”

**Mr. Habib Baber (NESPAK Engineer)
(D-12, Islamabad)**

“ We thought we would let you know that we are very pleased with our new insulated roof by heat resistant and water proof Solar Chips of Dynamic Solar International. It is exactly as we expected. It looks very good and although we have not had bright sunshine yet, indications are that it will have the desired effect of reducing the temperatures previously achieved. You were highly recommended to us by friends who had an installation last year and that was the main reason we contacted you. Thanks a lot for your good supervision. ”

TESTIMONIAL

Commodore Abid Ihsan (Navel Anchorage)

“ We thought we would let you know that we are very pleased with our new insulated roof by heat resistant and water proof Solar Chips of Dynamic Solar International. It is exactly as we expected. It looks very good and although we have not had bright sunshine yet, indications are that it will have the desired effect of reducing the temperatures previously achieved. You were highly recommended to us by friends who had an installation last year and that was the main reason we contacted you. Thanks a lot for your good supervision. ”

Air Vice Marshal Sohail (Bahira Town)

“ We are extremely pleased with our new insulated roof with heat resistant and water proof Solar Chips of Dynamic Solar International. It has already made a tremendous temperature difference as we can use our house in extreme weather conditions, (something we were not able to do comfortably in the past), whilst on a hot and sunny day the temperature remains low. We would be perfectly happy to act as a reference to any future potential clients. ”

Mr. Salman Butt (MD, Salman's Corporation Pvt. Ltd.)

“ Thank you so much for a wonderful service and product, I wish I had found your company Dynamic Solar International years ago. The temperature difference is amazing after this heat resistant and water proof insulation in hot summer season. You supervised the work sincerely, gave us valuable information and time. The insulation is really affordable. Once again, thank you so much. ”

Col Kamran Butt (Professor NUST)

“ I would like to take this time to thank your company Dynamic Solar International for insulating our roof by heat resistant and water proof Solar Chips, and a great service from your team. My new insulated roof looks shining and bright. Inside the house we feel calm and relaxed. The work turned up on time. You were very flexible to my needs and did a professional job. It was a pleasure dealing with your company rather than some other that lacked the ability to meet customer requirements. I am very happy with the job done and the price paid and I would be very willing to speak with any prospective customers in my area. ”
